DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of treating a dermal condition, classified in class 424, subclass 78.03.
- II. Claims 11-17, drawn to a composition, classified in class 424, subclass 78.03.
- III. Claims 18-20, drawn to a composition for treatment of dermal structures, classified in class 424, subclass 78.03.

The inventions are distinct, each from the other for the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed in Group II can be used in a materially different process of using that product, such as for treatment of a mucosal condition.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP §806.04, MPEP §808.01). In the instant case Group I is directed to a method of treating a dermal condition while Group II is directed to a composition for treatment of dermal structures.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP §806.04, MPEP §808.01). In the instant case Group II is directed to a composition comprising, *inter alia*, a moisture management system and a humectant (with no non-gellable polysaccharide), while Group III is directed to a composition comprising, *inter alia*, a non-gellable polysaccharide (with no moisture management system or humectant).

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hasan S. Ahmed whose telephone number is 571-272-4792. The examiner can normally be reached on 9am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Woodward can be reached on 571-272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
